

# BRING YOUR DATA TO LIFE WITH AIVA™

**AIVA™, EV's Asset Inspection Visualization and Analytics system revolutionizes data. By revealing key information about condition, status and performance, AIVA™ supports the management of wells, pipelines and other critical energy assets and infrastructures.**

AIVA™ is an all-in-one cloud-based platform that allows users to store, visualize and interact with a wide variety of logs and data types. A complete solution to integrate, manage and safeguard your data, instantly accessible from anywhere with internet access.

With the advanced PowerBI analytic tools of AIVA™ you can exploit your data to the fullest, resulting in faster, more complete answers and more effective decision-making.

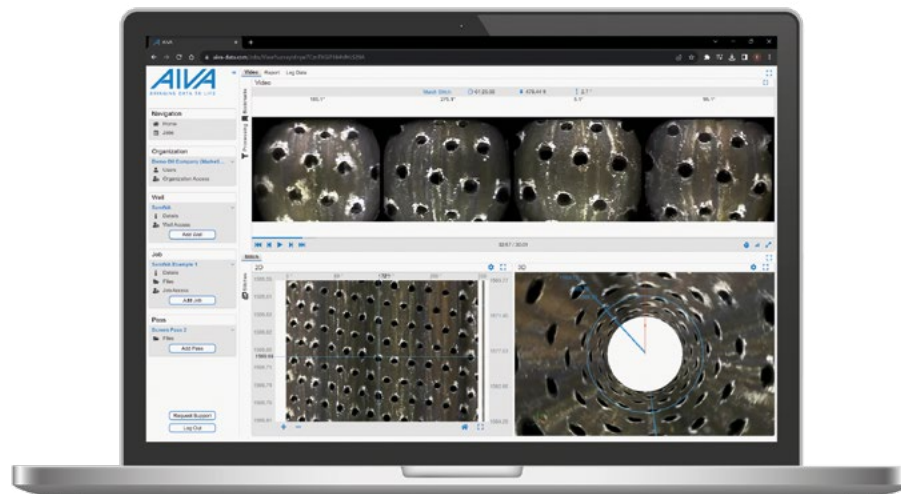

INTUITIVE VISUALIZATION  
AND ADVANCED ANALYTICS

**Log Data Visualization**

Delve into the detail with powerful interactive log data visualization tools

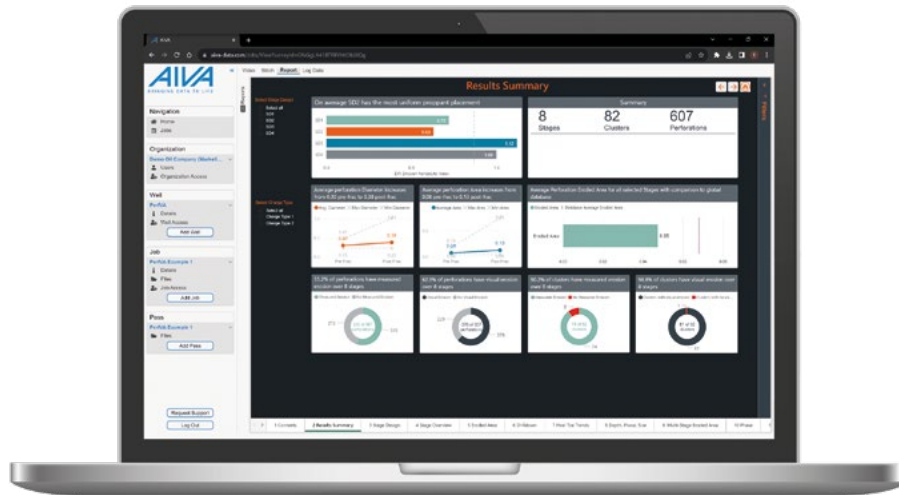

- Support for a wide range of logging tools and depth-based or time-based datasets
- Synchronized 2D and 3D data displays with real-time data statistics
- Support for array, and/or individual log plots with multi-track and multi-tab views
- Reveal trends with VDL, color coding, and shading functions
- Fully interactive zoom, pan, tilt and go-to controls
- Native support for EV-Epidote MIPS well integrity analysis datasets

**Video and Visual Analytics (V/I)**

Get a clearer perspective with high definition video imaging, with advance video playback and powerful 360-degree visualizations

- See a continuous, depth-based image for the complete circumference of the wellbore
- Interactive zoom and scrolling functions to hone in on areas of interest
- Annotations for depth, time, azimuth and deviation provided
- Simple navigation to specific depth or time using the Timeline feature
- Synchronized playback and one-click matching functions across all views
- Adjustable playback speed, real-time image enhancement and snapshot functions

POWER OF  
 THE CLOUD

### Data Analytics

Unleash the potential of your data with integrated PowerBI analytical tools

- Analyze overall trends with service specific dashboards
- Deep dive into data through drill-down capabilities
- Slice datasets with multiple-select filters to reveal subsets and micro-trends
- Visualize datasets with dynamic charting functions
- Benchmark performance relative to same well, field-wide or total well stock parameters
- Trace data back to source data with interactive tables and charts

SECURE

ALWAYS  
 AVAILABLE

SCALABLE  
 STORAGE

GLOBAL  
 SUPPORT

SOFTWARE  
 AS A SERVICE  
 (SAAS)

### Powerful, Intuitive Interface

A fully flexible user interface enabling customized views to access and display the information any way you like

- Each panel supports full screen, window or tile mode
- Optimize the size of each window with simple drag and drop function
- Drag and snap individual panels to position anywhere on screen
- Tab function to quickly switch between views
- Rapidly navigate to through Log Data, Video, and Analytics using bookmarks
- Optimization of on-screen viewing area with roll-away menus and control panels

## SOFTWARE AS A SERVICE (SAAS)

AIVA™ is available as a Software as a Service (SaaS) solution to all of our customers and technical partners. Running on a standard web browser, there is no software to install, making AIVA™ easy to deploy and ideal for collaboration, helping you to make decisions more effectively and improve productivity.

Subscribers will enjoy the same secure cloud-based storage, intuitive visualization, and powerful analytics tools for a wide range of cased hole datasets, with near limitless applications to provide a complete solution to help you integrate, manage and safeguard your data, while making it instantly available whenever needed.

### Benefits:

- Safe, secure, 24/7 access for a wide range of data
- Advanced visualization and analytics functions
- Easy to deploy Software as a Service solution
- Faster answers and better decisions
- Life-of-asset applications
